A MESSAGE FROM EMMA

Hello everybody

We all hope that you are healthy and enjoying the sunny weather.

You may have heard in the news, how the government is hoping to open schools after June 1st. Here at Camborne Nursery School we would love to be back to normal but recognise this is going to be a long way off. We miss the children.

We are following advice from the government and local authority to ensure children can return to nursery in as safe an environment as possible. We may be in contact with you this week to talk about how you feel and to give you any information we have.

We are at the beginning of a very slow start as we need to ensure all safety measures are in place before we have children back in the nursery

I would like to reassure you that all children have their places guaranteed for September and we hope by then we will be back to some normality.

If you have questions or would like to talk to a member of staff please email Debbie on secretary@camborne-nursery.cornwall.sch.uk and a member of staff will get back to you.

In the meantime stay safe and keep watching our videos on the website <https://www.camborne-nursery.cornwall.sch.uk/>

We all send you our best wishes.

Emma

Thank you for sending us
your lovely photos!

Advice for parents during coronavirus

Whilst coronavirus is infectious to children it is rarely serious. If your child is unwell it is likely to be a non-coronavirus illness, rather than coronavirus itself.

Whilst it is extremely important to follow Government advice to stay at home during this period, it can be confusing to know what to do when your child is unwell or injured. Remember that NHS 111, GPs and hospitals are still providing the same safe care that they have always done. Here is some advice to help:

RED

If your child has any of the following:

- Becomes pale, mottled and feels abnormally cold to the touch
- Has pauses in their breathing (apnoeas), has an irregular breathing pattern or starts **grunting**
- Severe difficulty in breathing becoming agitated or unresponsive
- Is going blue round the lips
- Has a fit/seizure
- Becomes extremely distressed (crying inconsolably despite distraction), confused, very lethargic (difficult to wake) or unresponsive
- Develops a rash that does not disappear with pressure (the 'Glass test')
- Has testicular pain, especially in teenage boys

You need urgent help:

Go to the nearest A&E department
or phone 999

AMBER

If your child has any of the following:

- Is finding it hard to breathe including drawing in of the muscles below their lower ribs, at their neck or between their ribs (**recession**) or **head bobbing**
- Seems dehydrated (dry mouth, sunken eyes, no tears, drowsy or passing less urine than usual)
- Is becoming drowsy (excessively sleepy) or irritable (unable to settle them with toys, TV, food or picking up) - especially if they remain drowsy or irritable despite their fever coming down
- Has extreme shivering or complains of muscle pain
- Babies under 3 months of age with a temperature above 38°C / 100.4°F
- Infants 3-6 months of age with a temperature above 39°C / 102.2°F
- For all infants and children with a fever above 38°C for more than 5 days.
- Is getting worse or if you are worried
- Has persistent vomiting and/or persistent severe abdominal pain
- Has blood in their poo or wee
- Any limb injury causing reduced movement, persistent pain or head injury causing persistent crying or drowsiness

You need to contact a doctor or nurse today.

Please ring your GP surgery or call
NHS 111 - dial 111

The NHS is working for you. However, we recognise during the current coronavirus crisis at peak times, access to a health care professional may be delayed. If symptoms persist for 4 hours or more and you have not been able to speak to either a GP or 111, then take your child to the nearest A&E

GREEN

If none of the above features are present

- You can continue to provide your child care at home. Information is also available on NHS Choices
- Additional **advice** is available to families for coping with crying of well babies **ICON**
- Additional **advice** is available for children with complex health needs and disabilities.

Self care

Continue providing your child's care at home. If you are still concerned about your child, call NHS 111 - dial 111
